EXPERIENCE

Backend developer

Mirabo JSC | Dec 2021 - Present

- Coordinate with BA, BrSE to analyze business, estimate time and provide solutions to customer problems.
- Design and develop efficient and maintainable software according to the business objectives and needs of the company's various clients.
- Build code base, design database and implement API with NestJS / Typescript
- Build serverless application with Python on Azure Function
- Maintain and develop new features for voice calling application

Projects:

- **Cluster of projects in logistics and management:** Outsource projects on bill of lading management, camera management, iron and steel transportation intermediary website... from Japanese customers. My primary responsibility is building APIs on the backend. I consistently achieve a performance level around 110% - 115% compared to the initial estimates.
- **Real estate business center:** The website is an intermediary channel that helps Japanese people rent, buy and sell real estate. Together with Brse, we advise customers on reasonable solutions for their businesses.
